Bird Feeding 101

Wednesday October 29, 2025 7-8:30pm

Backyard 'bird feeding' is a fun and rewarding hobby for everyone in our community. It is good for the birds as it can support local populations and increase species diversity. It is also **good for you** as it can enhance your mental well-being by bringing nature up-close!

We will discuss various types of bird feeders, seeds and suets as well as the '**Top 10 ways**' to provide for birds in your backyard.

Whether you have been feeding birds for years or are new to this hobby, **join our presentation** to learn how to safely attract more chickadees, hummingbirds and woodpeckers (and less squirrels!) into your backyard!

Wednesday October 29 7-8:30pm
at the **Silver Ridge Park- Westerly ClubHouse** 39 Millbrook Drive
(this presentation is open to the public)

Co-Gardeners: Sandy C. (973) 476-7825 & David D. (908) 415-3321
